4, 5	Moderate-High
6 plus	High

STATIC-99R

Risk Reporting Statements

Below are paragraphs that have been determined to be appropriate to use when reporting risk levels for the Static-99R.

If score is -3:

On the Static-99R which predicts sexual recidivism this offender scored in the low risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 0.7% to 2.0% after 5 years.

If score is -2:

On the Static-99R which predicts sexual recidivism this offender scored in the low risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 1.0% to 2.6% after 5 years.

If score is -1:

On the Static-99R which predicts sexual recidivism this offender scored in the low risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 1.3% to 3.4% after 5 years.

If score is 0:

On the Static-99R which predicts sexual recidivism this offender scored in the low risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 1.8% to 4.4% after 5 years.

If score is 1:

On the Static-99R which predicts sexual recidivism this offender scored in the low risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 2.5% to 5.8% after 5 years.

If score is 2:

On the Static-99R which predicts sexual recidivism this offender scored in the moderate-low risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 3.4% to 7.4% after 5 years.

If score is 3:

On the Static-99R which predicts sexual recidivism this offender scored in the moderate-low risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 4.6% to 9.6% after 5 years.

If score is 4:

On the Static-99R which predicts sexual recidivism this offender scored in the moderate-high risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 6.1% to 12.2% after 5 years.

If score is 5:

On the Static-99R which predicts sexual recidivism this offender scored in the moderate-high risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 8.2% to 15.6% after 5 years.

If score is 6:

On the Static-99R which predicts sexual recidivism this offender scored in the high risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 10.8% to 19.7% after 5 years.

If score is 7:

On the Static-99R which predicts sexual recidivism this offender scored in the high risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 14.0% to 24.7% after 5 years.

If score is 8:

On the Static-99R which predicts sexual recidivism this offender scored in the high risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 18.0% to 30.6% after 5 years.

If score is 9 or more:

On the Static-99R which predicts sexual recidivism this offender scored in the high risk range. Offenders with this same score from the routine samples have been found to sexually recidivate at 22.8% to 37.2% after 5 years.
