Partnership Meeting Frequency:

Twice Monthly/As indicated by the judicial fellow and/or project director

Youth Referred into Partnership:

Adjudicated Undisciplined
Adjudicated Delinquent
Diverted
Diversion with Plan
Diversion with Contract
Pending Adjudication
Screening Everyone
JCPC Programs

Services Provided within Partnership:

Diagnostic Assessments
Intensive In-Home
Multi-systemic Therapy
Outpatient Substance Abuse Services
Substance Abuse Intensive Outpatient
Level II Residential
Therapeutic Foster Care
Level III Residential
Level IV Residential
PRTF
Individual Therapy
Family Therapy

Group Therapy
Day Treatment
Mobile Crisis Management

***Evidence Based Practices/
Treatments Provided:***

Global Appraisal of Individual Needs
Trauma Focused CBT
Seven Challenges
MET/CBT
Aggression Replacement Training
Strengthening Families
Effective Black Parenting

Screening Process:

Any court involved youth are screened by the court counseling staff with the GAIN SS and are referred if there is possible indication of substance abuse. Youth are then referred to Cumberland Single Assessor - CommuniCare.

Assessment Process:

Each youth will receive an assessment using the GAIN Initial and will receive a urine test. If youth has a DSM-IV diagnosis for substance abuse or substance dependence, they are then admitted into JJSAMHP services.

Treatment Process:

The family selects from Best Practice services based on recommendation of JJSAMHP Assessor and Child and Family team. CFT meetings should be held once per month and drive service decision for the youth and the family.

Screening Process:

DJJ office uses the GAIN Short Screener for
 Adjudicated Delinquent, Adjudicated
 Undisciplined, and Diversion contract youth.
 This information is passed on to a full-time
 assessor.

Assessment Process:

An assessor, being funded by JJSAMHP,
 conducts all the assessments at DJJ office. The
 assessor is employed by an adult provider, which

helps eliminate pressure to refer to services within the agency.

Treatment Process:

The family selects from Best Practice services based on recommendation of JJSAMHP Assessor and Child and Family team. CFT meetings should be held once per month and drive service decision for the youth and the family.

Brief Challenges (offered at Wake Detention)

Family Centered Treatment (FCT)

Intercept

Substance Abuse Intensive Outpatient (SAIOP)

Screening Process:

Screenings are conducted on any court involved youth (diversion contracts and more involved) who are not already receiving treatment services. The youth and families are referred for

evaluations by juvenile court counselors based on identified screening indicators that reflect a need for assessment and possible treatment services (GAIN Short Screen). If a youth comes to the attention of DJJ already in services with a treatment provider, the DJJ Court Counselor reviews the PCP with provider and family to determine if the current level of care is appropriate. If the youth is not connected to treatment services, a referral is made to the Juvenile Assessment Team (JAT) for a comprehensive MH/SA evaluation (GAIN-I).

Assessment Process:

JAT is made up of 2 FTE licensed clinicians who complete a single, comprehensive, individualized clinical evaluation process to assess mental health and substance abuse issues, determine eligibility for available funding sources, make recommendations, and link the juvenile court involved youth and their families to appropriate mental health and substance abuse services and supports. Challenges) with youth in Wake Detention.

Treatment Process:

The comprehensive and individualized evaluation process yields better outcomes for youth and families through objective matching of youth to appropriate services and supports based on professional assessment recommendations and consumer choice. Once the youth and families engage with a treatment provider, a Child and Family Team is initiated to develop and monitor a person-centered plan (PCP). The Child and Family Teams meet monthly, as well as any time there is an urgent need to review/revise the PCP.

Global Appraisal of Individual Needs (GAIN)
Seven Challenges
Trauma Focused CBT
MET/CBT
Multi-systemic Therapy

Screening Process:

Court involved youth will receive a GAIN SS. Each DJJDP will identify which youth will receive this screening based on their current structure and individual district/county needs. Based on the outcome of the GAIN SS the Court Counselor will offer child/family provider choice and make referral to one of the Partnership providers for GAIN-I assessment.

Assessment Process:

The JJSAMHP Partnership clinician will complete a full GAIN assessment and make clinically appropriate recommendations. The assessing clinician will offer the consumer/family provider choice and make

referrals to identified service and chosen partnership provider.

Treatment Process:

Each youth will have a Child and Family Team that will help design and guide treatment options. The Child and Family Team meets at least monthly for each youth and other child serving agencies as well as family advocates are actively recruited to be part of the treatment process for each youth.

 Contingency Management
 Motivational Interviewing
 Adolescent Community Reinforcement
 Approach (A-CRA)-Halifax
 Love and Logic-Halifax

Screening Process:

The Risk and Needs Assessment is completed in Halifax and GAIN Short Screener is used in the four other counties. Juvenile Family Data Sheet and screening information is provided to all providers except Integrated Family Services, by facsimile.

Assessment Process:

District 6A uses a Comprehensive Clinical Assessment modeled after the JJTC Assessment and Global Appraisal of Individual Needs is used in the four other counties.

Treatment Process:

Families are provided services through Integrated Family Services and Family Preservation Services unless there is a service not within these provider's arrays. If a child is receiving an enhanced benefit, child and family team meetings are to occur every 30 days in Halifax County. High priority cases are staffed weekly and non-high priority cases are staffed at least once per month. In four counties, Child and Family Teams are held as needed.

About Us:

Reclaiming Futures began in September 2013 in
 Mecklenburg County as an initiative within the

Mecklenburg County Youth Treatment Court. We are supported by Mecklenburg County Criminal Justice Services, whose mission is to promote improvements in the criminal justice system through interagency cooperation, coordination and planning. We aim to improve the identification of substance abuse and mental health treatment needs, the availability and quality of substance abuse and mental health services, and the network of natural community resources for the juveniles in our Youth Treatment Court. We hope to expand our Reclaiming Futures efforts to enhance, enrich, and strengthen the treatment services and community resources for all of our youth.

Plan:

To promote a coordinated effort to improve the outcomes of juvenile justice-involved youth from a recovery-oriented systems of care approach. The plan focuses on youth and family engagement in the assessment process and quality and access to emotional and social supportive services.

Youth Referred into Partnership:

All Court Involved youth receive GAIN SS; any scoring above 5 Total Score are referred for a psychological evaluation; those scoring a 3 or 4 on the GAIN-SS are referred for a Comprehensive Clinical Assessment, those referred on to the RF Juvenile Drug Treatment Court are given a GAIN-I assessment with ongoing intervention and follow-up through the Drug Court program.

Services Provided within Partnership:

Diagnostic Assessments
Intensive-In-Home
**Multi-systemic Family Therapy
Outpatient Substance Abuse Services
Substance Abuse Intensive Outpatient
**Mobile Crisis Management
Day Treatment
Therapeutic Foster Care
Level 3 Residential
Individual Therapy
Family Therapy
Group Therapy

**These services are not provided by partnership providers but kids in partnership program have access to these services via MOA between LME and providers who do these services.

***Evidence Based Practices/
Treatments Provided:***

Global Appraisal of Individual Needs
Trauma Focused CBT
MET/CBT
Seven Challenges

Screening Process:

All youth who come into the court office are screened using the GAIN-SS. If a youth scores 5

or higher on the GAIN-SS (or indicates high risk such as endorsing suicidal thoughts), they will be sent to the JJSAMHP funded counselor housed in DJJDP for an assessment.

Assessment Process:

The JJSAMHP funded counselor meets with the juvenile and their family and conducts a GAIN-Quick or schedules a GAIN I, as needed and asks additional questions. Based on their responses, the youth may immediately be referred for services. The JJSAMHP funded counselor works to have an appointment in the family's hands when they leave the courthouse.

Treatment Process:

Services are provided by three main providers unless there is a need that the provider cannot address, and the youth and their family are then referred to an outside provider.

Elizabeth City NC 27906

About Us:

The mission of the Department of Public Safety is to improve the quality of life of North Carolinians by reducing crime and enhancing public safety. Within DPS, the mission of the Division of Juvenile Justice (DJJ) is to reduce and prevent juvenile delinquency by effectively intervening, educating, and treating youth in order to strengthen families and increase public safety. In District 6, DJJ collaborates with community partners, including judges to determine and provide the right program for each youth, provide accurate assessment

and effective treatment of youth, and prevent youths from entering, or further involvement in, the juvenile justice system.

Reclaiming Futures District 6 covers Bertie, Halifax, Hertford, and Northampton Counties. We are implementing the Reclaiming Futures model by using local leadership that is driven by our district court judges. District 6 utilizes the collaborative efforts between our MCO, treatment providers, community advocates as well as JCPC funded agencies. We are working to improve the quality of life for our youth and families within their communities through alcohol and drug treatment services available to youth.

Plan:

Monitor the ability to increase the availability of both treatment and “beyond treatment” services in our community. Improve treatment services for adolescent drug and alcohol use. Monitor the number and types of pro-social resources available to support our youths and how often we are able to match youths appropriately. Create a comprehensive system of care that coordinates services for both youth and their families which will include prevention, education, intervention and treatment efforts. Involve the community in order to create new opportunities for youth and families. Improve treatment services for drug and alcohol use. Create a comprehensive system of care that coordinates social services. Involve the community in creating new opportunities for youth.

Screening Process:

Staff utilize the GAIN Short Screener and youth with a Moderate or High Score are referred to one of three assessment Providers: Waynesboro Family Clinic, PORT Human Services, and Family First Support Center.

Assessment Process:

A GAIN Initial or Core assessment is completed on each youth that is referred by JJSAMHP. Information from the assessment is shared with JJSAMHP staff and used for Child and Family team process. The youth and family are

encouraged to participate in recommended services where they have been assessed by a partner provider. Should other services be needed or youth and family prefer another provider, client choice is allowed.

Treatment Process:

A Child and Family Team is held for each youth after their assessment is completed. Child and Family teams are then held once per month or more often if needed and decisions about treatment are made in collaboration with the family.

<i>Evidence Based Practices/ Treatments Provided:</i>	Global Appraisal of Individual Needs Trauma Focused CBT Strengthening Families Multidimensional Family Therapy Incredible Years Child Behavior Checklist Family Centered Treatment
<i>Screening Process:</i>	Intake Counselors utilize the GAIN Short Screener on any youth that is adjudicated and on youth with diversion contract. The results are forwarded to any of the four providers according to location and district.
<i>Assessment Process:</i>	All four providers utilize the Comprehensive Clinical Assessment for their assessments and has a team of licensed professionals and qualified professionals that work together to complete the assessment process. The providers

also used computerized Child Behavior Checklists. The information from the assessment is then shared with the family, treatment provider (s) and DJJ staff to help in directing and organizing the Child and Family Team. The youth and their family can be referred to anyone in a network of providers in the area.

Treatment Process:

Youth are referred to services based on their needs and as outlined in their Child and Family Team. Child and Family Teams are held at least one time a month or more often based on the needs of the youth and their family. The teams also work to include a family partner for each family that can advocate and assist in engagement processes for the families.

Global Appraisal of Needs
 Trauma Focused CBT
 Multi-systemic Therapy
 Cannabis Youth Treatment Series
 Seven Challenges
 Motivational Interviewing
 Strengthening Families

Screening Process:

All Districts use the GAIN-SS and the Risks and Needs Assessment for screening of youth. Youth are referred for evaluations by court counselors based on screening indicators that reflect a need for assessment and possible treatment service. If a youth comes to the attention of DJJDP already in services with a treatment provider, the DJJ Court Counselor reviews current services with provider and family to determine if the current level of care is meeting client needs. If youth is

not connected to another treatment service, a referral is made to one of the JJSAMHP providers. A referral form and consent form are sent to the single portal contact designated by the JJSAMHP provider agency. Court Counselors have the option of referring youth to the Court Liaison position with Daymark if the youth has no clinical home and has intensive service needs.

Assessment Process:

If a youth does not have a clinical home, then he/she is referred to one of the JJSAMHP providers where they will be administered the GAIN, the CBCL, or the BASC-2. The youth is then given a comprehensive clinical assessment and may get a psychiatric assessment if indicated. Treatment recommendations are based on assessment results. The guardian has the option to receive service from the provider performing the assessment or be referred to any provider in the MCO network. If the youth is already involved with another treatment provider other than a JJSAMHP provider, these providers base treatment recommendations on the outcome of a comprehensive clinical assessment they perform. The goal of the JJSAMHP management team is to promote the use of evidenced based assessment by all providers of services to DJJ involved youth.

Treatment Process:

Treatment services are determined through a comprehensive clinical assessment and must meet medical necessity as determined by the assessor and MCO. The treating provider serves as the clinical home for the referred youth. The clinical home is responsible for coordination and facilitation of Child and Family Team meetings. Children receiving enhanced or residential services have monthly CFT meetings. Decisions about treatment are made in collaboration with the family. Family Advocates are available if needed by the family.

 SASSI

Screening Process:

The Juvenile Court Counselors screen all adjudicated youth and youth with diversion contracts using the GAIN SS. Any youth with moderate or high scores on any subscale (except CJ score) are referred to the Single Assessor and Treatment Expediter. The single Assessor completes the CCA and SASSI and makes referrals to JJSAMHP/ RF Provider Panel, with family choice. The JJSAMHP/ RF Providers complete the CBCL within the first 30 days of treatment. Consent for referral is obtained on each youth.

Assessment Process:

Single Assessor completes Comprehensive Clinical Assessment and SASSI on DJJDP referred youth. JJSAMHP/ RF Providers complete CBCL within the first 30 days of treatment. Court Counselors complete GAIN SS on all youth.

Treatment Process:

All Provider Agencies lead the initial Child and Family Team Meeting. Based on assessment results and Child and Family Team recommendations, youth and families are referred for services to any of our eight partnering agencies in this Initiative, based on family choice or to another agency in the community based on family choice.

Screening Process:

Juvenile Court Counselors use the GAIN-SS District 1- Diversion, Pre-Adjudication, and Adjudication with a score of 3 or higher; for District 2-Diversion, Pre-Adjudication, Adjudication, and PRS. Court Counselors complete a referral sheet on any youth with a score of 3 or higher. Family members must sign a consent form in order to participate. Then, a referral is faxed to the Assessment Providers at Uplift Foundation.

Assessment Process:

Uplift Foundation completes the GAIN-I or a Comprehensive Clinical Assessment, and a recommendation is made based on the assessment. Juvenile Court Counselors are notified of recommendation(s).

Treatment Process:

The Assessment Provider will refer families to services based on the Assessment findings. Families will have choice in the provider agency. CFTs are scheduled within 21 days of initiation of services.

Multi-Systemic Therapy (MST)
Seven Challenges

Screening Process:

Any court involved youth or youth referred to Juvenile Justice for services are screened by the court counselor staff with the GAIN Short Screen. Those scoring any item under substance abuse or a three or more overall on the GAIN SS are referred for a substance abuse/co-occurring mental health disorder comprehensive clinical assessment. Youth may also be referred based on other information indicating a need for an assessment.

Assessment Process:

Each youth referred receives a comprehensive clinical assessment by Youth Villages utilizing the GAIN Lite along with a drug screening test for those with indicators for a possible substance use disorder. If youth have a DSM diagnosis for substance use or mental health, they are then referred to a JJSAMHP-involved provider for admission for substance abuse/co-occurring mental health treatment services.” Youth can also be referred for Prevention Services or to other providers as indicated for residential or other specialized services or resources.

Treatment Process:

Treatment is holistic, with family and community-based supports to “wrap” services around juveniles in ways to reduce/eliminate substance use and avoid future legal consequences. An array of service levels is available including ASAM Level I, II and III. Services are provided within culturally sensitive, motivational and recovery-oriented frameworks. Available treatment modalities include Multi-Systemic Therapy (MST), Adolescent Community Reinforcement Approach, Cognitive-Behavioral Therapy, Trauma-Focused Cognitive-Behavioral Therapy, and sex offender treatment services.
