

A/N/D Hearings by Volume

List the hearing types by volume (the largest number) with the most volume at the bottom, working your way up to the least volume at the top).

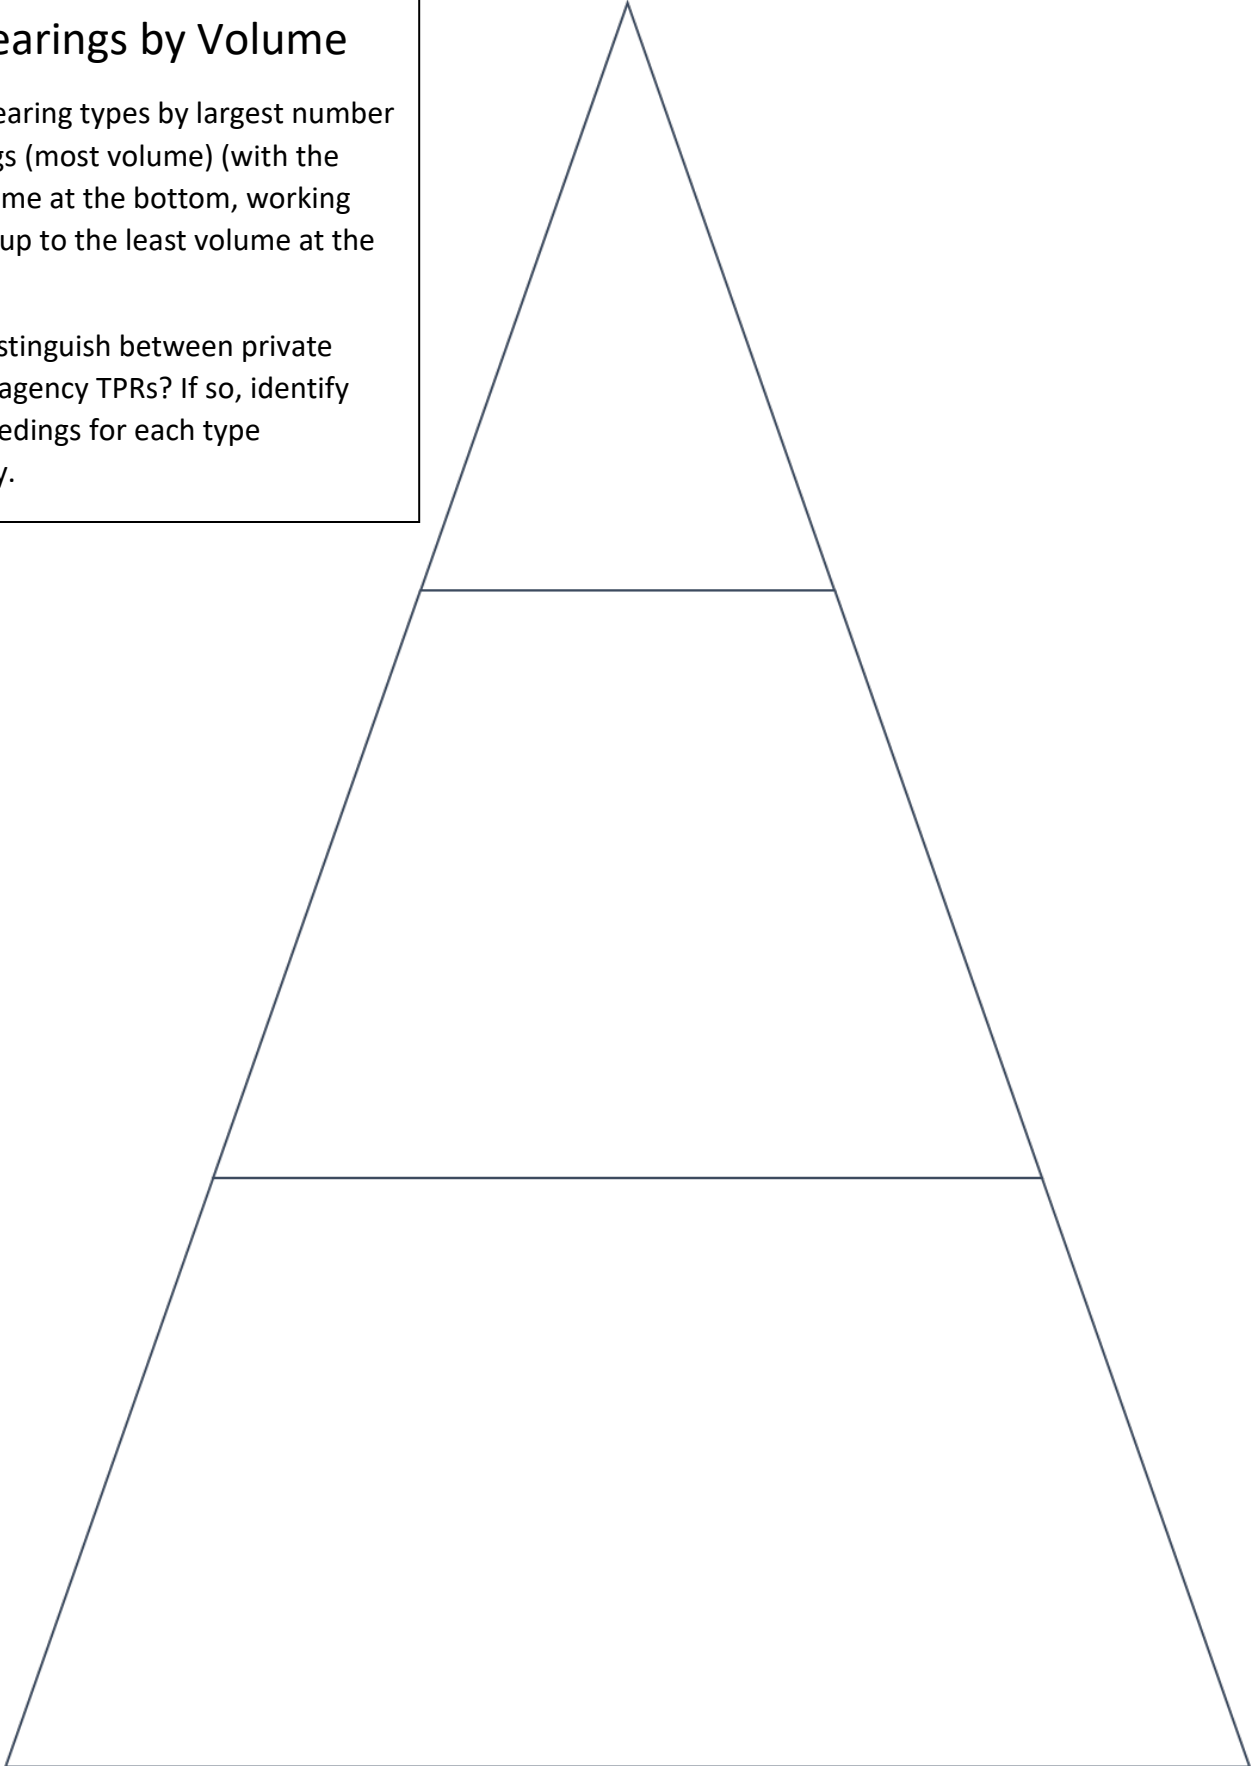

Can any hearings be combined (e.g. pre-adjudicatory hearing; review/permanency planning)? If so please indicate with an asterisk or other marker to identify which hearings can be combined with or scheduled on the same day as other hearings.

TPR Hearings by Volume

List the hearing types by largest number of hearings (most volume) (with the most volume at the bottom, working your way up to the least volume at the top).

Do you distinguish between private TPRs and agency TPRs? If so, identify the proceedings for each type separately.

A/N/D – TPR Hearings Priority

Using your separate A/N/D and TRP pyramids, complete this pyramid to list all the hearing types by volume. On the outside of the pyramid next to each hearing type, write the number indicating the level of priority (1 being the highest priority, 2 the second highest, etc.). Identify the 3 hearing types that are the most time consuming by circling the number.
