## Purpose and Methodology

ETC Institute administered the DirectionFinder® survey for the Town of Chapel Hill during November and December of 2011. This is the second time that the survey was administered for the Town. The first time was during the same time period in 2009, providing valuable TREND information for the Town. The surveys were administered as part of the Town’s effort to assess citizen satisfaction with the quality of services. The information gathered from the surveys will help the Town establish budget priorities and refine policy decisions.

**Resident Survey.** A seven-page survey was mailed to a random sample of 2,000 households in the Town of Chapel Hill. Approximately seven days after the surveys were mailed, residents who received the survey were contacted by phone. Those who indicated that they had not returned the survey were given the option of completing it by phone. Of the households that received a survey, 255 completed the survey by phone and 352 returned it by mail for a total of 607 completed surveys (31% response rate). The results for the random sample of 607 households have a 95% level of confidence with a precision of at least +/- 4%. There were no statistically significant differences in the results of the survey based on the method of administration (phone vs. mail). In order to better understand how well services are being delivered by the Town, ETC Institute geocoded the home address of respondents to the survey. The map to the right shows the physical distribution of survey respondents based on the location of their home.

The percentage of “don’t know” responses has been excluded from many of the graphs shown in this report to facilitate valid comparisons of the results from the Town of Chapel Hill with the results from other communities in the *DirectionFinder®* database. Since the number of “don’t know” responses often reflects the utilization and awareness of city services, the percentage of “don’t know” responses has been provided in the tabular data section of this report. When the “don’t know” responses have

been excluded, the text of this report will indicate that the responses have been excluded with the phrase “*who had an opinion.*”

This report contains:

- a summary of the methodology for administering the survey and major findings
- GIS maps that show the results of selected questions as maps of the Town
- benchmarking data that shows how the results for the Town of Chapel Hill compare to other cities
- importance-satisfaction analysis
- tables that show the results for each question on the survey
- a copy of the survey instrument.

## Major Findings

- **Most of the residents surveyed were satisfied with Town services.** Eighty-five percent (85%) of the residents surveyed who had an opinion were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of the Town’s public safety services, 84% were satisfied with the overall quality of services provided, 82% were satisfied with the quality of the Town’s library services, and 81% were satisfied with the maintenance of Town parks and recreation programs. **TRENDS: Change that is referred to as “significant” is above or below the +/-4% margin of error. For the Town Services category, there were several areas that improved significantly. The most significant increases were with the maintenance of public housing, the value received for Town tax dollars and fees, and how well the Town is managing growth.**
- **Services that residents thought should receive the most increase in emphasis over the next two years.** The areas that residents thought should receive the most increase in emphasis from the Town of Chapel Hill over the next two years were: (1) overall flow of traffic and congestion, and (2) how well the Town is prepared for the future.
- **Perceptions of the Town.** Most (90%) of the residents surveyed *who had an opinion* indicated that they were satisfied with the quality of life in the Town of Chapel Hill, 88% were satisfied with the image of the Town, and 80% were satisfied with the overall feeling of safety in the Town. **TRENDS: The most significant increase in this category, was the acceptance of diverse populations.**
- **Public Safety.** This year, Fire and Emergency Management Services and Police Services were addressed in separate questions.
  - **Fire and Emergency Management Services** Ninety-three percent (93%) of the residents surveyed *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of local fire protection, and 90% were satisfied with how quickly fire units respond to emergencies.

- **Police Services** Eighty-four percent (84%) of the residents surveyed *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with the overall quality of police protection, and 83% were satisfied with how quickly police respond to emergencies.

**TRENDS: A significant increase for Fire and Emergency Management was with the overall quality of local fire protection. Significant increases for the Police Department were with the visibility of police in neighborhoods, and the Town’s effort to prevent crime.**

- **Town Regulations.** Sixty-three percent (63%) of the residents surveyed *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with enforcing sign regulations, and 61% were satisfied with enforcing maintenance of business property. **TRENDS: There was a significant increase with enforcing of sign regulations.**
- **Parks and Recreation.** Eighty-four percent (84%) of the residents *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with the maintenance of town parks, 73% were satisfied with the number of town parks, and 73% were satisfied with the landscaping and appearance of public areas along streets. **TRENDS: The most significant increases were realized in the number of walking and biking trails, public art and cultural arts programs, and therapeutic recreation programs.**
- **Library Services.** Ninety-one percent (91%) of the residents surveyed *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of assistance provided by the library staff, 86% were satisfied with the overall quality of library services, and 85% were satisfied with the access to library facilities and services. **TRENDS: The most significant increases were with the number of recorded books available and the quality of children’s programs.**
- **Town Maintenance/Public Works.** The areas of maintenance that were rated best by residents included: maintenance of street signs and pavement markings (74%), maintenance of streets in your neighborhood (73%), and the maintenance of main Town street thoroughfares (73%). Residents were generally least satisfied with the adequacy of street lighting. **TRENDS: The maintenance and preservation of downtown increased significantly from 2009.**
- **Town Communications.** More than half (65%) of the residents surveyed *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of the Town’s website, Chapel Hill eNews updates (64%), and with access to information on local issues and events (62%). **TRENDS: There was a significant increase in nearly every area of communication.**
- **Transportation.** Seventy-four percent (74%) of the residents surveyed *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with the quality of Chapel Hill Transit, 64% of those surveyed were satisfied with the availability of greenways, and 52% were

satisfied with the availability of sidewalks in the Town. **TRENDS: A significant increase was realized with the availability of greenways and walking trails.**

- The most congested East/West Road is US 15-501 South
  - The most congested North/South Road is Fordham Boulevard
  - Seventy percent (46%) of respondents have at least one member of their household who has used public transit in Chapel Hill
  - Fifty-one percent (51%) of those surveyed ride a bicycle
  - Sixty-four percent (64%) felt that riding a bicycle in Chapel Hill was safe.
- **Trash Service.** Ninety-three percent (90%) of the residents surveyed *who had an opinion* were satisfied (rating of 4 or 5 on a 5-point scale) with residential trash collection service, 85% of those surveyed were satisfied with residential recycling service, and 80% were satisfied with yard waste removal.

### **Other Findings.**

- 62% of the 51% that ride a bike in Chapel Hill chose separate bike paths as their most preferred bicycle amenity.
- 59% of residents surveyed indicated that they use recycling services located in Chapel Hill or Eubanks Road.
- 42% of residents indicated that a re-developed downtown was the most important of 12 possible capital improvement issues.
- 71% of residents felt a re-developed downtown was essential (39%) or important (32%) as a part of the Town's economic development strategy. Comparing the positives (71%) to the negatives (15%), the ratio is nearly 5 to 1.
- 62% of those surveyed were dissatisfied with the availability of parking in downtown Chapel Hill.
- 94% of the residents surveyed indicated that the quality of safety and security played an important role when deciding to live in the Town of Chapel Hill.

# DirectionFinder® Survey

## Benchmarking Summary Report

### Overview

ETC Institute's *DirectionFinder* program was originally developed in 1999 to help community leaders across the United States use statistically valid community survey data as a tool for making better decisions. Since November 1999, the survey has been administered in more than 210 cities and counties in 43 states. Most participating communities conduct the survey on an annual or biennial basis.

This report contains benchmarking data from two sources: (1) a national survey that was administered by ETC Institute during February and March of 2010 to a random sample of 4,377 residents in the continental United States, (2) a regional survey that was administered to a random sample of 388 residents in the Southeastern region of the United States during May and June 2011. The states included in the Southeastern region are: Kentucky, North Carolina, Tennessee, South Carolina, Alabama, Arkansas, Mississippi, Louisiana and Georgia.

Some of the cities included in the performance ranges that are shown in this report are listed below:

- Ames, IA (Iowa State)
- Auburn, AL (Auburn)
- Austin, TX (University of Texas)
- Charlottesville, VA (University of VA)
- Columbia, MO (University of Missouri)
- Des Moines, IA (Drake)
- Durham, NC (Duke)
- Iowa City, IA (University of Iowa)
- Lawrence, KS (University of Kansas)
- Manhattan, KS (Kansas State University)
- Norman, OK (University of Oklahoma)
- Princeton, NJ (Princeton)
- Providence, RI (Brown and Providence)
- Lubbock, TX (Texas Tech)
- Rolla, MO (University of Missouri at Rolla)
- Sioux Falls (South Dakota State)
- Springfield, MO (Missouri State)
- Tamarac, Florida
- West Des Moines, Iowa
- Tempe, AZ (Arizona State)
- Tucson, AZ (University of Arizona)
- Yuma, Arizona

## Interpreting the Performance Range Charts

The charts on the following pages provide comparisons for several items that were rated on the survey. The horizontal bars show the range of satisfaction among residents in communities that have participated in the DirectionFinder® Survey during the past two years. The lowest and highest satisfaction ratings are listed to the left and right of each bar. The yellow dot on each bar shows how the results for Chapel Hill compare to the community average, which is shown as a vertical dash in the middle of each horizontal bar. If the yellow dot is located to the right of the vertical dash, the Town of Chapel Hill rated above the community average. If the yellow dot is located to the left of the vertical dash, the Town of Chapel Hill rated below the community average.

# Importance-Satisfaction Analysis

## The Town of Chapel Hill, North Carolina

### Overview

Today, community officials have limited resources which need to be targeted to activities that are of the most benefit to their citizens. Two of the most important criteria for decision making are (1) to target resources toward services of the highest importance to citizens; and (2) to target resources toward those services where citizens are the least satisfied.

The Importance-Satisfaction (IS) rating is a unique tool that allows public officials to better understand both of these highly important decision making criteria for each of the services they are providing. The Importance-Satisfaction rating is based on the concept that cities will maximize overall citizen satisfaction by emphasizing improvements in those service categories where the level of satisfaction is relatively low and the perceived importance of the service is relatively high.

### Methodology

The rating is calculated by summing the percentage of responses for items selected as the first, second, and third most important services for the Town to emphasize over the next two years. This sum is then multiplied by 1 minus the percentage of respondents that indicated they were positively satisfied with the Town's performance in the related area (the sum of the ratings of 4 and 5 on a 5-point scale excluding "don't know" responses). "Don't know" responses are excluded from the calculation to ensure that the satisfaction ratings among service categories are comparable.  $[IS = \text{Importance} \times (1 - \text{Satisfaction})]$ .

**Example of the Calculation.** Respondents were asked to identify the major categories of town services they thought should receive the most emphasis over the next two years. Thirteen percent (13%) ranked "Quality of Town parks and recreation programs and facilities" as one of the most important service to emphasize over the next two years.

With regard to satisfaction, “Quality of Town parks and recreation programs and facilities” was ranked fourth overall with 81% rating “Quality of Town parks and recreation programs and facilities” as a “4” or a “5” on a 5-point scale excluding “Don't know” responses. The I-S rating for “Quality of Town parks and recreation programs and facilities” was calculated by multiplying the sum of the most important percentages by 1 minus the sum of the satisfaction percentages. In this example, 13% was multiplied by 19% (1-0.81). This calculation yielded an I-S rating of **0.0247**, which was ranked tenth out of seventeen major service categories.

The maximum rating is 1.00 and would be achieved when 100% of the respondents select an item as one of their top three choices to emphasize over the next two years and 0% indicate that they are positively satisfied with the delivery of the service.

The lowest rating is 0.00 and could be achieved under either one of the following two situations:

- if 100% of the respondents were positively satisfied with the delivery of the service
- if none (0%) of the respondents selected the service as one of the three most important areas for the Town to emphasize over the next two years.

## Interpreting the Ratings

Ratings that are greater than or equal to 0.20 identify areas that should receive significantly more emphasis over the next two years. Ratings from .10 to .20 identify service areas that should receive increased emphasis. Ratings less than .10 should continue to receive the current level of emphasis.

- Definitely Increase Emphasis ( $IS \geq 0.20$ )
- Increase Current Emphasis ( $0.10 \leq IS < 0.20$ )
- Maintain Current Emphasis ( $IS < 0.10$ )

The results for the Town of Chapel Hill are provided on the following page.

**Note:** The I-S Rating is calculated by multiplying the "Most Important" % by (1-'Satisfaction' %)

**Most Important %:**

The "Most Important" percentage represents the sum of the first, second, and third most important responses for each item. Respondents were asked to identify the items they thought should receive the most emphasis over the next two years.

**Satisfaction %:**

The "Satisfaction" percentage represents the sum of the ratings "4" and "5" excluding 'don't know'. Respondents ranked their level of satisfaction with each of the items on a scale of 1 to 5 with "5" being very satisfied and "1" being very dissatisfied.

## **Importance-Satisfaction Matrix Analysis**

The Importance-Satisfaction rating is based on the concept that public agencies will maximize overall customer satisfaction by emphasizing improvements in those areas where the level of satisfaction is relatively low and the perceived importance of the service is relatively high. ETC Institute developed an Importance-Satisfaction Matrix to display the perceived importance of major services that were assessed on the survey against the perceived quality of service delivery. The two axes on the matrix represent Satisfaction (vertical) and relative Importance (horizontal).

The I-S (Importance-Satisfaction) matrix should be interpreted as follows.

- *Continued Emphasis (above average importance and above average satisfaction).* This area shows where the Town is meeting customer expectations. Items in this area have a significant impact on the customer's overall level of satisfaction. The Town should maintain (or slightly increase) emphasis on items in this area.
- *Exceeding Expectations (below average importance and above average satisfaction).* This area shows where the Town is performing significantly better than customers expect the Town to perform. Items in this area do not significantly affect the overall level of satisfaction that residents have with Town services. The Town should maintain (or slightly decrease) emphasis on items in this area.
- *Opportunities for Improvement (above average importance and below average satisfaction).* This area shows where the Town is not performing as well as residents expect the Town to perform. This area has a significant impact on customer satisfaction, and the Town should DEFINITELY increase emphasis on items in this area.
- *Less Important (below average importance and below average satisfaction).* This area shows where the Town is not performing well relative to the Town's performance in other areas; however, this area is generally considered to be less important to residents. This area does not significantly affect overall satisfaction with Town services because the items are less important to residents. The agency should maintain current levels of emphasis on items in this area.

## Interpreting the Maps

The maps on the following pages show the mean ratings for several questions on the survey by Census Block Group. A Census Block Group is an area defined by the U.S. Census Bureau, which is generally smaller than a zip code but larger than a neighborhood.

If all areas on a map are the same color, then residents generally feel the same about that issue regardless of the location of their home.

When reading the maps, please use the following color scheme as a guide:

- **DARK/LIGHT BLUE** shades indicate POSITIVE ratings. Shades of blue generally indicate satisfaction with a service.
- **OFF-WHITE** shades indicate NEUTRAL ratings. Shades of neutral generally indicate that residents thought the quality of service delivery is adequate.
- **ORANGE/RED** shades indicate NEGATIVE ratings. Shades of orange/red generally indicate dissatisfaction with a service.

November 2011

Dear Chapel Hill Resident,

Please help the Town of Chapel Hill plan for the future by completing the survey attached here. The Community Survey is conducted every two years and provides guidance in improving services and establishing budget priorities. If you are not a resident of Chapel Hill, you may disregard this survey

Chapel Hill seeks active resident involvement in Town government. Results from the 2011 survey will provide valuable input toward a visioning process (Chapel Hill 2020) that began earlier this fall to shape the town's direction in a sustainable way for the next 10 years. Learn more about how your friends and neighbors are working together on the creation of our new comprehensive plan at [www.chapelhill2020.org](http://www.chapelhill2020.org) and [www.2020buzz.org](http://www.2020buzz.org).

A postage-paid return envelope addressed to ETC Institute has been provided for your convenience. ETC Institute is our partner in this effort, and they will compile the results and present a report to the Town. Your responses to the questions in the survey are anonymous. The sticker on the survey identifies responses from broad geographic areas and helps us know where we might improve our service delivery.

The results of the survey will be presented to the Town Council and to the public by February 2012. The results from our last community survey are available for review at Town Hall and at [www.townofchapelhill.org/survey](http://www.townofchapelhill.org/survey). Survey results will be provided in a future issue of the Town's electronic newsletter, *Chapel Hill eNews*. If you wish to subscribe to the news service, contact [info@townofchapelhill.org](mailto:info@townofchapelhill.org).

If you have any questions, please contact Catherine Lazorko, public information officer, at 919-969-5055 or contact me at [manager@townofchapelhill.org](mailto:manager@townofchapelhill.org). Thank you for helping guide the direction of our community by completing the enclosed survey.

Sincerely,

Roger L. Stancil  
Town Manager
