

## Matrix of Key Components of Information Technology Capacity in Educational Units

Note: All numbers represent the median or mode of the data set

Note: The data reflected for the school systems is not representative of each individual school; it is for the entire school system.

\*The data regarding total number of PCs refers to both administrative and instructional PCs. The number of administrative PCs in the school systems refers to only those PCs that are not located in the classroom. The PCs used by teachers for instruction and administration are not included in this count.

\*\*The type of Internet connection does not imply that each classroom has such a connection; again, the data is for the entire school system.
