

Sample Evaluation Planning Matrix

Project/Program to be evaluated:

Program goal:

Important context: (What's happening and who cares?)

Stakeholders: (Who needs to buy in to results?)

Deadline:

Team: (Who is going to do the work and stand behind results?)

Budget/Cost:

## Sample Evaluation Planning Matrix

**Project/Program to be evaluated:** TarHeelboro Farmer's Market Food Sharing Program

**Program goal:** to reduce hunger by diverting surplus farmers market products from waste and encouraging donations to community pantries

**Important Context:** This program was started by a single local farmer 5 years ago and has grown dramatically. They are now seen as a model for similar programs. But they have always just "done stuff". Now, to secure local government and foundation funds to scale up, they need to be seen as not just a 'one shot wonder' or anecdotal success story. They need to have a plan/theory of how the program is effective and measures of success.

**Stakeholders:** Farmers who donate produce; individual contributors; potential funders (specifically the Really Big Foundation which has invited a proposal for funding, and potential partners/regulators, specifically Mayor Carolina Blue, a major vocal political supporter, City Planner Jones, and Depts of Ag, Public Health and Revenue officials who are now taking notice of the program).

**Deadline:** If grant funds are received from the Really Big Foundation, the evaluation report will be due by January 1.

**Team:** Evaluation Director will be a third-party volunteer consultant, aided by in-house staff of Joyce (program manager) and Ray, intern.

**Cost:** Budget is capped at \$500
