CHANGES COMING FOR CHARTER SCHOOL REPORTING

- Beginning in FY $\underline{\mathbf{2019}}$, charter school financials will need to include the parent NFP
- For NFPs that hold more than one school charter, each school will be reported as a separate fund
- For 2018, we will publish illustratives of both, including more robust note disclosures on the NFP and the relationship between the charter school(s) and any associated foundations
- Will also be focusing on correct reporting of foundations that should be presented as blended CUs

GASB 73

- Most units got the message and had actuarial study done or contacted us with request for reprieve due to obvious immateriality
- Now that study is done, auditors talk with clients and determine if need to continue to have them done; we are assuming that units will
- Deadline to request exemption was August 1, 2018 not necessary if we have already approved exemption
 - Should be revisited periodically to ensure that circumstances don't change
- Those few units that neglected to have a study will be required to have one for 2018 unless we have approved you not having a study

 - Unique circumstances under which it is possible for this liability to be immaterial

PRE-AUDIT

- The number one issue we see across the state with pre-audit is that units are not encumbering their contracts
 - Even if they are multi-year, encumber current year, encumber each year going forward
 - Even if they are hourly rate contracts, estimate and encumber that amount
