Redistricting

www.poynerspruill.com

Does your Board/Commission need to redistrict?

- Does your jurisdiction use true election districts?
- Are you within the permissible deviation range? (more on this later)
- What is the likelihood of this being the case?
 - Extremely low

Who draws the new districts?

The governing body for the local government.

By statute:

The Board of County Commissioners (NCGS 153A-22) The Board of Education (NCGS 115C-37(i)) The City Council (NCGS 160A-23.1)

What does this look like in practice?

- In many instances, governing bodies will engage a consultant to assist with the process
- This will generally be a lawyer and/or a demographer
- In some jurisdictions, the local GIS department or other staff members may lead effort
- Access to specialized mapping software is critical

What data is needed in order to redistrict?

- Census data
- Data/files for current district lines

Redistricting

Why do you need current district data if you're engaging in <u>re</u>districting?

- Determine whether you must redistrict (you probably do)
- In other words, are your districts unlawful due to population imbalances?
- 2 rules:

10% and +/- 5% rule

How long does the process take?

- Plan for a several month process, with a minimum of 3-4 public meetings
- It depends on several factors, including but not limited to:
 - Your regular meeting schedule
 - Your willingness to call special meetings
 - Whether you staff the process in-house vs. hire a consultant
 - Whether your jurisdiction coordinates with another jurisdiction (i.e., a board of county commissioners and board of education choose to use the same districts)
 - The number of draft plans you request
 - The type and amount of public input you receive

Redistricting

What happens after a finding is made that your districts need to be redrawn?

- Decide your guiding criteria
 - Contiguity
 - Recognizing communities of interest (i.e., precincts, municipal boundaries, physical features like roads and waterways, and/or other historical, cultural, or economic community)
 - Compactness
 - Preserving the core of existing districts
 - Avoiding pairing incumbents (known as "double bunking" to promote stability)

What happens next?

- Your consultant will take your existing districts, the new census data, and your criteria, and draw some number of redistricting plans.
- Legal review to make sure they are compliant with law and criteria
- Public hearing to present/discuss those plans

What happens next?

- Expect maps to be presented from members of the community
- Your team will have to determine how plans will be accepted, including any specified submittal processes, file formats, explanatory text, etc.

Redistricting

How does the Board/Commission select a plan?

- There is no specific guidance in the statutes
- In practice, the Board/Commission will discuss the various plans with the consultant or staff
- It may quickly reach consensus or a single plan, or ask the consultant to make adjustments
- At some point, the Board/Commission typically will vote to move forward with a particular plan and schedule a public hearing to receive input from the public

- A note on the Open Meetings Law and the Public Records Act:
 - The Open Meetings Law applies to redistricting just as to other governmental functions
 - Likewise, the Public Records Act will apply to your redistricting work
 - Assume that all documents created during the redistricting process would be subject to a Public Records Request

More on public hearings

- Note—technically, public hearing are not required but are strongly recommended
- It should be well publicized. The plan under consideration should be made available to the public before the meeting and at the meeting
- Members of the public should be invited to address the Board/Commission regarding the plan(s) under consideration and other topics relevant to the redistricting process
- Once the hearing is closed, the Board can engage in further discussion regarding the feedback it has received

Redistricting

How is a plan adopted?

- It will be put into words through a resolution
- The Board/Commission may discuss the resolution and then vote to adopt it by majority vote just as other matters and resolutions are adopted.
- It will then need to be sent to the county board of election and likely the NC Secretary of State, Register of Deeds, NC Register, etc.

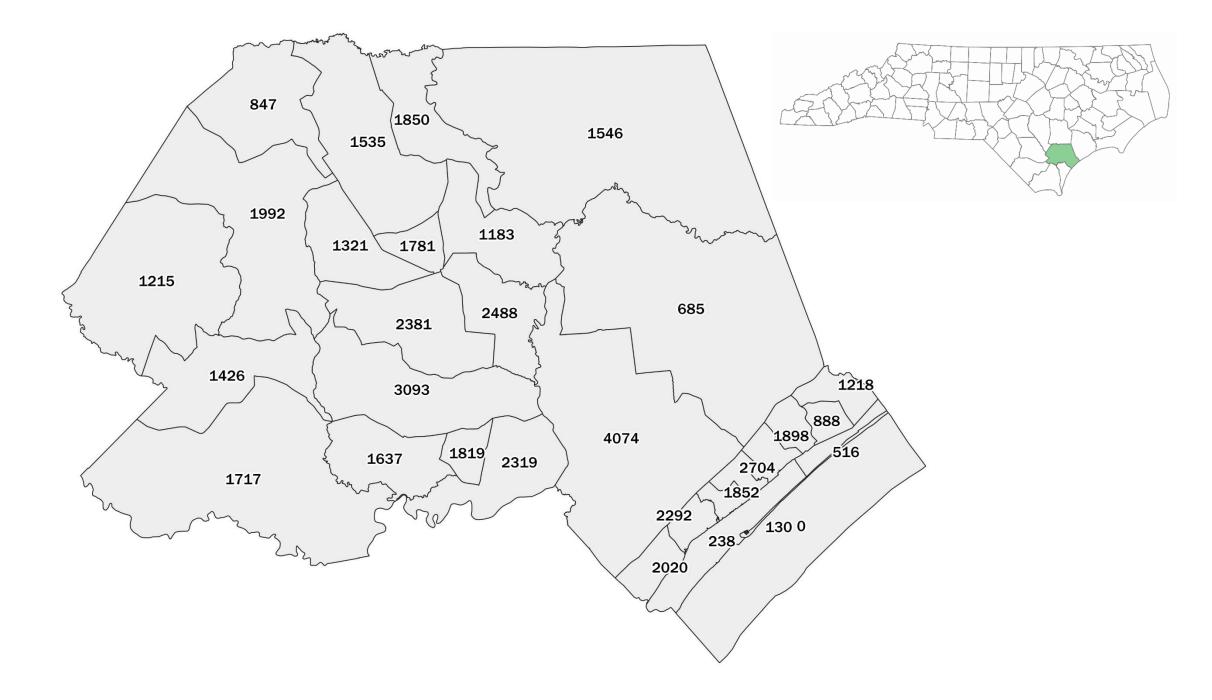

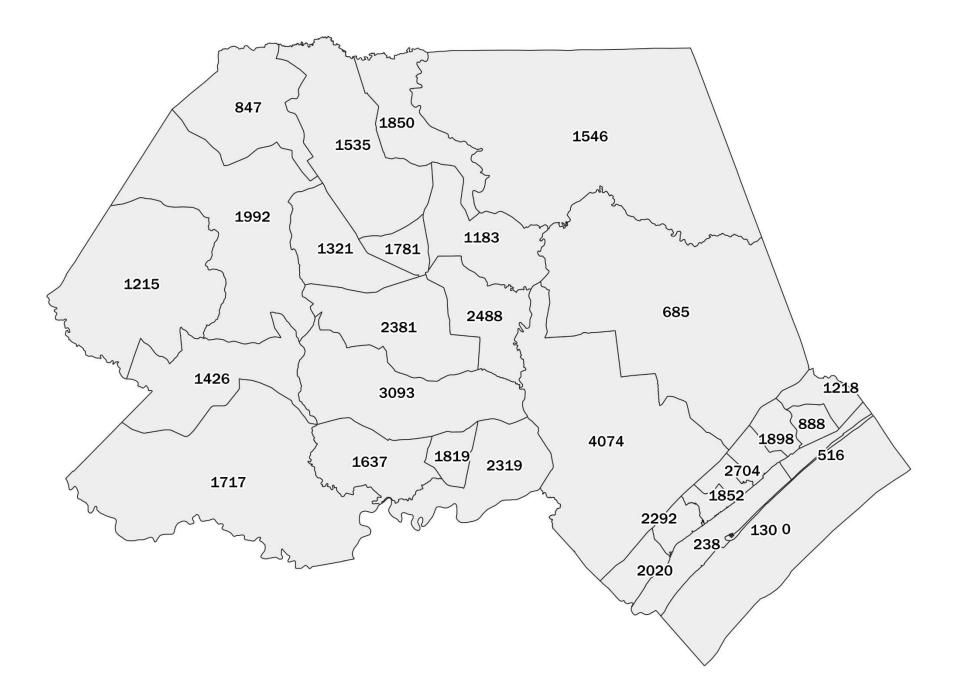

Then, congratulations! You are finished with local redistricting for the decade!
