<i>Partnership Meeting Frequency:</i>	Quarterly
<i>Youth Referred Into Partnership:</i>	Adjudicated Delinquent Adjudicated Undisciplined Diversion Contract
<i>Services Provided within Partnership:</i>	Diagnostic Assessments Intensive In Home Multisystemic Therapy Outpatient Substance Abuse Services Substance Abuse Intensive Outpatient Individual Therapy Family Therapy Group Therapy Mobile Crisis Management
<i>Evidence Based Practices/ Treatments Provided:</i>	Trauma Focused CBT Seven Challenges MET/CBT Multisystemic Therapy
<i>Screening Process:</i>	DJJ office uses the GAIN Short Screener for Adjudicated Delinquent, Adjudicated Undisciplined, and Diversion contract youth. This information is passed on to a full time assessor.
<i>Assessment Process:</i>	An assessor, being funded by JJSAMHP, conducts all the assessments at DJJ office. The assessor is employed by an adult provider, which helps eliminate pressure to refer to services within the agency.
<i>Treatment Process:</i>	The family selects from Best Practice services based on recommendation of JJSAMHP Assessor and Child and Family team. CFT meetings should be held once per month and drive service decision for the youth and the family.

Youth Referred Into Partnership:	Any Court Involved Youth
Services Provided within Partnership:	Comprehensive Clinical Assessments Behavioral Health Outpatient (MH/SA) <ul style="list-style-type: none"> ▪ Individual Therapy ▪ Family Therapy ▪ Group Therapy Intensive In-Home Multisystemic Therapy Substance Abuse Intensive Outpatient Day Treatment Mobile Crisis Management (Residential Services are available, but are not part of the Core JJ Network)
Evidence Based Practices/ Treatments Provided:	Multisystemic Therapy MET/CBT Brief Strategic Family Therapy (BSFT) Functional Family Therapy Seven Challenges
Screening Process:	Screenings are conducted on any court involved youth (diversion contracts and more involved) who are not already receiving treatment services. The youth and families are referred for evaluations by juvenile court counselors based on identified screening indicators that reflect a need for assessment and possible treatment services. If a youth comes to the attention of DJJ already in services with a treatment provider, the DJJ Court Counselor reviews the PCP with provider and family to determine if the current level of care is appropriate. If the youth is not connected to treatment services, a referral is made to the Juvenile Court Assessment Team for a comprehensive MH/SA evaluation utilizing the GAIN.
Assessment Process:	The Juvenile Court Assessment Team is made up of 1 FTE licensed clinician who completes a

single, comprehensive, individualized clinical evaluation process to assess mental health and substance abuse issues, determine eligibility for available funding sources, make recommendations, and link the juvenile court involved youth and their families to appropriate mental health and substance abuse services and supports.

Treatment Process:

The comprehensive and individualized evaluation process yields better outcomes for youth and families through objective matching of youth to appropriate services and supports based on professional assessment recommendations and consumer choice. Once the youth and families engage with a treatment provider, a Child and Family Team is initiated to develop and monitor a person centered plan (PCP). The Child and Family Teams meet monthly, as well as any time there is an urgent need to review/revise the PCP.

Day Treatment

Mobile Crisis Management

***Evidence Based Practices/
Treatments Provided:***

Global Appraisal of Individual Needs – Used for initial screening (GAIN SS) and the comprehensive clinical assessment for mental health and substance abuse diagnosis

Trauma Focused CBT – 7 Communicare clinicians are either rostered or in the process of rostering with the NC Child Treatment program
Structured Psychotherapy for Adolescents Responding to Chronic Stress (SPARCS) is a group modality for youth that may or may not meet the clinical trauma diagnosis. Clinicians are being rostered through the NC Child Treatment program for this EBP.

Seven Challenges – Still being used in SAIOP/Brief Challenges is used in the juvenile detention center.

MET/CBT

Aggression Replacement Training

Strengthening Families

Screening Process:

Any court involved youth are screened by the court counseling staff with the GAIN SS and are referred if there is possible indication of substance abuse. Youth are then referred to Cumberland CommuniCare.

Assessment Process:

Each youth will receive an assessment using the GAIN Initial and also will receive a urine test. If youth has a DSM-IV diagnosis for substance

abuse or substance dependence, they are then admitted into JJSAMHP services.

Treatment Process:

Treatment is holistic, with family and community based supports to “wrap” services around juveniles in ways to reduce/eliminate substance use and avoid future legal consequences. Services are generally provided through Cumberland CommuniCare unless the youth needs something outside of their service array.

Global Appraisal of Individual Needs-4 Counties
 Trauma Focused CBT
 Seven Challenges-4 Counties
 Contingency Management
 Motivational Interviewing
 Adolescent Community Reinforcement
 Approach (A-CRA)-Halifax
 Love and Logic-Halifax

Screening Process:

The Risk and Needs Assessment is completed in Halifax and GAIN Short Screener is used in the four other counties. Juvenile Family Data Sheet and screening information is provided to all providers except Integrated Family Services, by facsimile.

Assessment Process:

District 6A uses a Comprehensive Clinical Assessment modeled after the JJTC Assessment and Global Appraisal of Individual Needs is used in the 4 other counties.

Treatment Process:

Families are provided services through Integrated Family Services and Family Preservation Services unless there is a service not within these provider's arrays. If a child is receiving an enhanced benefit, child and family team meetings are to occur every 30 days in

Halifax County. High priority cases are staffed weekly and non-high priority cases are staffed at least once per month. In 4 Counties, Child and Family teams are held as needed.

Global Appraisal of Individual Needs (GAIN)
 Seven Challenges
 Trauma Focused CBT
 MET/CBT
 Multisystemic Therapy

Screening Process:

Court involved youth will receive a GAIN SS. Each DJJDP will identify which youth will receive this screening based on their current structure and individual district/county needs. Based on the outcome of the GAIN SS the Court Counselor will offer child/family provider choice and make referral to one of the Partnership providers for GAIN-I assessment.

Assessment Process:

The JJSAMHP Partnership clinician will complete a full GAIN assessment and make clinically appropriate recommendations. The assessing clinician will offer the consumer/family provider choice and make referrals to identified service and chosen partnership provider.

Treatment Process:

Each youth will have a Child and Family Team that will help design and guide treatment options. The Child and Family Team meets at least monthly for each youth and other child serving agencies as well as family advocates are actively recruited to be part of the treatment process for each youth.

***Evidence Based Practices/
Treatments Provided:***

Global Appraisal of Individual Needs
 Trauma Focused CBT
 MET/CBT
 Seven Challenges

Screening Process:

All youth who come into the court office are screened using the GAIN-SS. If a youth scores 5 or higher on the GAIN-SS (or indicates high risk such as endorsing suicidal thoughts), they will be sent to the JJSAMHP funded counselor housed in DJJDP for an assessment.

Assessment Process:

The JJSAMHP funded counselor meets with the juvenile and their family and conducts a GAIN-Quick or schedules a GAIN I, as needed and asks additional questions. Based on their responses, the youth may immediately be referred for services. The JJSAMHP funded counselor works to have an appointment in the family's hands when they leave the courthouse.

Treatment Process:

Services are provided by three main Providers unless there is a need that the provider cannot address and the youth and their family are then referred to an outside provider.

Screening Process:

Juvenile Court Counselors use the GAIN-SS District 1-Diversion Contract and Adjudication and for District 2-Diversion, Pre-Adjudication, Adjudication, and PRS. Court Counselors complete a referral sheet on any youth who scores in the Moderate or High range. Family members must sign a consent form in order to participate. Then, a referral is faxed to the Assessment Providers at Uplift Foundation.

Assessment Process:

The GAIN-I is being used by the Uplift Foundation who are certified in administration of the GAIN. After the assessment is completed, a Child and Family Team is held.

Treatment Process:

The Assessment providers will refer families to services based on the CFT meeting to either their agency or to another agency in the community

<i>Evidence Based Practices/ Treatments Provided:</i>	Global Appraisal of Individual Needs Multisystemic Therapy Seven Challenges MET/CBT Trauma Focused CBT
<i>Screening Process:</i>	Staff utilize the GAIN Short Screener and youth with a Moderate or High Score are referred to one of the assessment Providers: Waynesboro Family Clinic, Easter Seals, Pride, NC Mentor and Family First Support Center.
<i>Assessment Process:</i>	A GAIN Initial or Core assessment is completed on each youth that is referred by JJSAMHP. Information from the assessment is shared with JJSAMHP staff and used for Child and Family team process. The youth and family are encouraged to participate in recommended services where they have been assessed by a partner provider. Should other services be needed or youth and family prefer another provider, client choice is allowed.

Treatment Process:

A Child and Family Team is held for each youth after their assessment is completed. Child and Family teams are then held once per month or more often if needed and decisions about treatment are made in collaboration with the family.

Screening Process:

Juvenile Court Counselors will
complete the Risk and Needs
Assessments and the GAIN SS for any
court involved youth (complaint filed,
diversion, probation, court
supervision, PRS). Any youth
determined to be eligible for a referral;

guardian will be assisted in contacting the LME/MCO Call Center to choose a partnership provider. DJJ will forward the Risk and Needs assessment results to the chosen the Provider Agencies.

Assessment Process:

The partnership provider completes the GAIN assessment. Recommended treatment services; the consumer/guardian has the option to receive services from the provider performing the assessment or choose another provider in the partnership and or Eastpointe Provider network.

Treatment Process:

Services will be offered based on the outcome of the assessment(s). Youth receiving enhanced services will have monthly Child and Family Teams to coordinate the Person Centered Plan.

Screening Process:

Juvenile Court Counselors use the GAIN-SS on any court involved youth (complaint filed, diversion, probation, court supervision, PRS). Any youth who scores in Moderate or High range is referred to the provider agency that the families have chosen from list above by contacting Eastpointe's Member Call Center. Juvenile Court Counselors also supply the juvenile data sheet to the Provider agencies.

Assessment Process:

The provider completes the GAIN assessment. Following recommendations for services the consumer/guardian has the option to receive services from the provider performing the assessment or choose another provider in the network.

Treatment Process:

The Provider Agencies will confirm initial appointment with family. They will conduct Child and Family Team meetings and hold one every 30 days for the youth. Information about treatment will be provided monthly to Juvenile Court Counselors and the Provider Agencies will

complete information for data reporting which is sent to the MCO staff.

 Incredible Years

Screening Process:

Intake Counselors utilize the GAIN Short Screener on any youth that is adjudicated and on youth with diversion contract. The results are forwarded to any of the four providers according to location and district.

Assessment Process:

All four providers utilize the Comprehensive Clinical Assessment for their assessments and has a team of licensed professionals and qualified professionals that work together to complete the assessment process. The information from the assessment is then shared with the family, treatment provider (s) and DJJ staff to help in directing and organizing the Child and Family Team. The youth and their family can be referred to anyone in a network of providers in the area.

Treatment Process:

Youth are referred to services based on their needs and as outlined in their Child and Family Team. Child and Family Teams are held at least one time a month or more often based on the needs of the youth and their family. The teams also work to include a family partner for each family that can advocate and assist in engagement processes for the families.

***Evidence Based Practices/
 Treatments Provided:***

Global Appraisal of Needs
 Trauma Focused CBT
 Multisystemic Therapy
 Cannabis Youth Treatment Series
 Seven Challenges
 Motivational Interviewing
 Strengthening Families

Screening Process:

All Districts use the GAIN-SS and the Risks and Needs Assessment for screening of youth. Youth are referred for evaluations by court counselors based on screening indicators that reflect a need for assessment and possible treatment service. If a youth comes to the attention of JJ already in services with a treatment provider, the JJ Court Counselor reviews current services with provider and family to determine if the current level of care is meeting client needs. If youth is not connected to another treatment service, a referral is made to one of our JJSAMHP providers. A referral form and consent form are sent to the provider single portal contact.

Assessment Process:

If a youth does not have a clinical home and is referred to a JJSAMHP provider, the provider administers the GAIN, CBCL, or BASC-2 and a urine drug screen. The youth is then given a comprehensive clinical assessment and may get a psychiatric assessment if indicated. Treatment recommendations are based on assessment results. The guardian has the option to receive service from the provider performing the assessment or be referred to any provider in the MCO network. If the youth is already involved with another treatment provider other than the JJSAMHP provider, these providers base treatment recommendations on the outcome of a comprehensive clinical assessment they perform. The goal of the JJSAMHP management team is to promote the use of evidenced based assessment by all providers of services to JJ involved youth.

Treatment Process:

Treatment services are determined through a comprehensive clinical assessment and must meet medical necessity as determined by the assessor and MCO. The treating provider serves as the clinical home for the referred youth. The clinical home is responsible for coordination and facilitation of Child and Family Team meetings. Children receiving enhanced or residential services have monthly CFT meetings. Decisions about treatment are made in collaboration with the family. Family Advocates are available if needed by the family.

<i>Screening Process:</i>	The Juvenile Court counselors screen all adjudicated Youth and youth with diversion contracts using the GAIN SS. Any youth with moderate or high scores on any subscale (except CJ score) are referred to one of our six

JJSAMHP/RF providers for an assessment and subsequent services. Consent for referral is obtained on each youth.

Assessment Process:

Youth and families have choice of one of our six JJSAMHP/RF providers for services. The provider chosen will complete either a GAIN, or a Comprehensive Clinical Assessment or other reliable and valid assessment tool on JJ referred youth.

Treatment Process:

One of six JJSAMHP/RF providers that has been chosen to provide the services will lead the initial Child and Family Team meeting. Based on assessment results and Child and Family Team recommendations, youth are referred for services to one of the six JJSAMHP/RF providers.

Juvenile Justice Treatment Continuum (JJTC)

Partnership Meeting Frequency:

- Quarterly JJSAMHP Meetings (more frequently as needed)
- Monthly Supervisor meetings for each Judicial District with the Chief Court Counselors, Providers, and LME/MCO staff
- Weekly Staffings with clinical staff and supervisors

Youth Referred Into Partnership:

Youth between the ages of 12 and 17 who are court involved and who score positive on the Gain Short Screen (administered by court counselor) or who have or are suspected of having a substance abuse or co-occurring substance abuse and mental health disorder.

Services Provided within Partnership:

Comprehensive Clinical Assessment, Prevention Services, Outpatient SA and MH individual, group and family therapy; Intensive In-Home; MST, and substance abuse residential services. Services may also include the following:

Case Management to coordinate care for legal involvement and address school and vocational issues, , referral for sex offender treatment, referral for Adolescent Day Treatment, or referral for SA and MH Therapeutic Foster Care..

Evidence Based Practices:

GAIN Short Screen
 GAIN Assessment
 Adolescent Community Reinforcement Approach (A-CRA) (training in process)
 Trauma-Focused CBT
 Multi-Systemic Therapy (MST)

Seven Challenges

Screening Process:

The initial point of entry is through the completion of a face-to-face screening by DJJ court counselor utilizing the GAIN Short Screen. Individuals who score positive on this instrument or who have other factors indicating possible substance abuse/co-occurring disorders are referred for a comprehensive clinical assessment utilizing the GAIN.

Assessment Process:

A comprehensive clinical assessment utilizing the GAIN is completed by Youth Villages and provides the clinical basis for the development of the Person Centered Plan (PCP), establishes medical necessity for services and recommends a Level of Care using ASAM Patient Placement Criteria (ASAM-PPC). Youth Villages facilitates referral for continuum of substance abuse and mental health treatment services based on needs and level of care identified in the comprehensive clinical assessment.. If treatment services are not indicated, the service provider makes other referrals or provides resources for the youth and/or family members

Treatment Process:

Treatment Services are determined through a comprehensive assessment process and must meet medical necessity as determined by the provider and the LME/MCO. Services may include outpatient individual and/or group therapy, family therapy, intensive in-home, MST, residential services, prevention services or referral for other indicated services. A System of Care approach is utilized throughout the treatment process.
